EDUCATION

Ateneo de Naga University

Bachelor of Science in Computer Science

Naga City, Camarines Sur

Aug. 2023 – May 2027 (Expected)

- **QPI:** 3.64 / 4.00 – Consistent Dean's Lister, 2x President's Lister
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Web Development, Discrete Mathematics

EXPERIENCE

Quality Assurance & Software Developer Intern

AVA Data Solutions

April 2026 – Present

Remote / Philippines

- Conduct manual stress and exploratory testing on a business management system used across **7 branches** (handling POS, scheduling, inventory, suppliers, and revenue tracking) to safeguard the **confidentiality, integrity, and availability (CIA triad)** of business data
- Coordinate with branch managers to investigate, reproduce, and document bug reports, producing detailed, reproducible reports for the engineering team to triage and resolve
- Develop responsive landing pages for client businesses using project-specific stacks including **Astro** and modern JavaScript frameworks, delivering production-ready frontends
- Apply prompt engineering techniques to accelerate development workflows and improve code quality output as a junior developer

Web Developer

ThePillars Publication – Ateneo de Naga University

Sept. 2025 – Present

Naga City, Camarines Sur

- Develop article pages for the official student publication's production website (thepillarspub.com) using **Nuxt.js** (Vue), serving the entire Atenean community across multiple sections including News, Editorial, Features, and Sports
- Built the **standings page** for the Ateneo de Naga University League 2025 intramurals coverage, with live updates that reflect game results in real time once a winner is recorded
- Implemented multiple standings formats within a single page to handle different sport types – bracket-based win/loss tracking for ball sports and ranking-based displays for cheer and dance, dance sports, and similar judged events

PROJECTS

Calamity Dash | *Unity, C#*

2025

- Selected as a **Department of Science and Technology National Game Development Finalist**, representing the Bicol Region
- Served as **Gameplay Programmer**, implementing core player mechanics, controls, and in-game interactions in C#
- Designed and built the in-game maps and environments, including level layout, obstacles, and interactive elements

Ledg.it | *Next.js 14, Supabase, Tailwind CSS, Chart.js, Gemini API* | [Live Site](#)

2025

- Developed a solo full-stack personal finance tracker for monitoring income and expenses with interactive spending charts and AI-powered insights
- Implemented dual authentication with email/password and **Google OAuth**, using **Supabase** (PostgreSQL, Storage) as the backend for user data and avatar uploads
- Integrated a real-time **Google Gemini**-powered AI assistant with streaming responses for conversational expense queries and insights

StayConnect | *MongoDB, Express.js, React 19, Node.js, JWT, Multer, Cloudinary* | [Live Site](#)

2025

- Built a full-stack accommodation booking platform end-to-end on the **MERN stack**, where users can list, browse, and book stays
- Implemented secure authentication using **JSON Web Tokens (JWT)** in httpOnly cookies and password hashing via **bcryptjs**

- Handled property image uploads to **Cloudinary** via **Multer** middleware, and developed a sortable listings grid with date-range booking and a mobile-responsive UI

C&D SnapLab | *React, Vite, Tailwind CSS, html2canvas, jsPDF* | [Live Site](#)

2025

- Designed and built a fully client-side web photobooth that captures 4 sequential webcam photos and compiles them into a downloadable PNG/PDF photostrip
- Implemented a countdown timer with flash effects, multiple strip layouts (vertical, grid, framed), dark/light theme toggle, and a fully responsive UI
- Used **html2canvas** and **jsPDF** for in-browser image composition and export, keeping all photo processing on the client for privacy

DMS Sinangag Website | *Astro* | [Live Site](#)

2026

- Built a multi-section marketing site for a 24/7 Filipino eatery as part of client work at AVA Data Solutions
- Developed an interactive menu browser with category filtering for 20+ items, Google Maps integration, and bilingual (Tagalog/English) UX optimized for local users

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, C#, C++, Java, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Vue.js, Nuxt.js, Node.js, Express.js, Astro, Tailwind CSS, Unity

Databases & Backend: MongoDB, Supabase, Oracle Database, SQL

APIs & Auth: REST APIs, JWT, Google OAuth, Google Gemini API, bcrypt

Tools & Platforms: Git, GitHub, VS Code, Figma, Postman, Notion, Canva,

Quality Assurance: Manual testing, exploratory testing, stress testing, bug reporting, security principles (Confidentiality, Integrity, Availability)

Other: Competitive programming, prompt engineering, AI-assisted development, responsive web design

AWARDS & ACHIEVEMENTS

Champion – Ateneo Software Festival 2025

Top 15 Finalist (Rank 5) – ADNU Competitive Programming Competition

National Finalist (Bicol Region Representative) – Department of Science and Technology Game Development Competition

President's Lister – Ateneo de Naga University (2 semesters)

Consistent Dean's Lister – Ateneo de Naga University

EXTRACURRICULAR ACTIVITIES

Participant – International Collegiate Programming Contest Asia-Manila Regional 2025, representing Ateneo de Naga University
